

Nairobi Muslims Academy Visits Physics Department

Tue, 2015-03-10 17:33

Location / Venue:

Physics Department

Dr. Simiyu (Co-ordinator, Schools Outreach Programme Dpt. of Physics) addressing students on career matters

The Nairobi Muslim Academy students visited the Department of Physics for career talk, and hands on laboratory tour. The school was hosted by the co-ordinator of Schools Outreach and Promotion of Physics Programme, Dr. J. Simiyu who took them through the available courses not only in the department but in the college of Biological and Physical Sciences. The students were also guided on career paths available and application of physics in different areas such as medical diagnosis, education, research and industrial processing.

The students were later taken on a guided tour of specialised research labs namely: laser, electronics, solid state and radioactive lab.

The students, led by their Physics teacher Mr. juma George, appreciated the tour and promised to take up technology courses in their career paths.
