

POST GRADUATE STUDENTS DEFEND THESIS

Date and time:

Thu, 2015-07-30 16:03

Location / Venue:

Dept. of LARMAT

Haggai Onyango Ndukhu defended his PHD Thesis in Soil Science.

Mr. Ndukhu's research topic was "*Crop Performance and soil Nutrient Dynamics under different Organic Based Cropping Systems in Central Kenya*".

Madegwa Msavi Yvonne defended her MSc. Thesis in Land and Water.

Ms. Madegwa's research topic was "*Modeling Nutrient Dynamics and Yield of Finger Millet (*eleusine coracana*) in Semi-arid Eastern Kenya using the Agricultural Simulator Model (APSM)*".

Wanjiku Gachie defended her MSc. Thesis in Land and Water. Ms. Gachie's research topic was *"Invitro Evaluation of Phizobacteria Isolates for Control of Bacterial Wilt and Growth Enhancement of Potato (Solanum tuberosum)"*.

Anyuka Noel Templer defended his MSc. Thesis in Sustainable Soil Resource Management. Mr. Anyuka's research topic was *"Enhancing Phosphorus release from Mijingu Rock Phosphate using legume Maize Cropping Systems for improved Maize Yields and Soil Properties in Kabete, Kiambu County"*.

Mirriam Nduku Muli defended her MSc. Thesis in Sustainable Soil Resource Management. Ms. Muli's research topic was *"Simulation of Soil Moisture and Crop Yields in Sorghum"*.

(sorghum bicolor i.) and Sweet Potato (ipomea batatas L. lam) based Cropping Systems using Cropsyst Model in Matuu Division, Kenya.
