

VETERINARY FARM HOSTCHANCELLOR, VICE-CHANCELLOR, DVCs, COLLEGE PRINCIPALS, STUDENT AND UNIVERSITY STAFF FOR TREE PLANTING IN COLLABORATION WITH LION CLUB KENYA –LAVINGTON CHAPTER/BRANCH

As part of its environmental conservation programme, the University of Nairobi held a tree planting event at the Faculty of Veterinary medicine farm, Kanyariri on the 24th of October 2015. The chief guest was the Chancellor of the University of Nairobi Dr (Mrs) Vijoo Rattansi accompanied by The Vice Chancellor Prof. Phillip Mbithi, members of the Nairobi Lions Club as well as students of the University of Nairobi and members of staff. Over 2000 trees were planted including indigenous species such as *Prunus africana*, *Podocarpus* spp. and the African olive tree. The whole event was a success and we know that this exercise indeed contributed to the increased forest cover in this country.
