

Training on Estimation and Projection Package (EPP)

The Post graduate Modeling students plans to have a training on EPP on 15th December 2015.

Date: 15th December 2015

Time: 9am to 3.30pm.

Trainer: Dr. Peter Young, [CDC Nairobi](#)

The Estimation and Projection Package (EPP) is used to estimate and project adult HIV prevalence from surveillance data.

The input to EPP is surveillance data from various sites and years showing HIV prevalence among pregnant women. EPP is used to fit a simple epidemic model to data from urban and rural sites. The prevalence projection produced by EPP can be transferred to Spectrum to calculate the number of people infected, AIDS cases, AIDS-related deaths, etc.
