

CONTINUOUS PROFESSIONAL DEVELOPMENT

In November and December 2014, Dr. Peter Chacha Magabe, a tutorial fellow and Vascular Interventional Radiologist in the Department of Diagnostic Imaging & Radiation Medicine, University of Nairobi attended the following workshops:

Prague, Czech Republic 9-13th Nov. 2014 - GIT intervention workshop

The workshop was aimed at updating the interventional radiologist on the latest techniques and devices in GIT interventions. Among the highlights were use of biodegradable stents for biliary and GIT work, the latest management of GI hemorrhages with TIPS and Danis Stents.

Berne, Switzerland 9-13th December 2014 - Peripheral arterial intervention workshop

This peripheral arterial intervention workshop was aimed at equipping the interventional radiologist with the latest techniques and devices in arterial peripheral interventions. This included the latest interventional endovascular techniques in dealing with limb ischemia and below knee revascularization and drug approaches in endovascular treatments of aortic aneurysms, among others.
